The revolutionary integration of **configurable safety** and **programmable logic** in a single, modular platform
Complexity.

This is today. Individual components from multiple vendors. Various platforms and protocols. Complicated wiring schematics. It’s no wonder development cycles are measured in months and years.
Simplicity.

SLATE™ from Honeywell brings together **configurable safety** and **programmable logic** for the first time ever. It’s one platform from one vendor that can easily be customized for almost any application – in less time with less complexity. It’s time to rethink how you bring combustion equipment management solutions to market. The revolution is here.
Faster time to market for a competitive advantage

Differentiation is the name of the game, but it requires time and money. SLATE™ streamlines and simplifies the product development process, helping you win in more industries and applications in a matter of weeks – not months or years.

Program faster
Flexible programming tools help you implement proprietary applications more quickly.

Cut engineering time
Eliminates complex, time-consuming wiring and programming.

Speed production
Load your custom application kit with a PC for faster duplication.

Simplify inventory
One platform from one vendor means significantly fewer products to source, purchase, stock and manage.

The SLATE toolkit

[Diagram of the SLATE toolkit including a base unit, touch screen display, burner control module, flame amp module, fuel air ratio control module, limit control module, annunciator module, digital I/O module, and analog I/O module.]
Serve more global industries with one platform

Expanding into new markets involves a costly learning curve with new products, protocols and programming. With SLATE, your team can engineer custom solutions for a variety of world markets without ever going back to the manufacturer.

Unparalleled application flexibility
SLATE is easily configured for virtually any application, including commercial, industrial, single- and multi-burner, boiler, industrial process and more.

Universal I/O scheme
Purchase only the modules your application requires and choose how to use them with simple wiring commands.

Customizable high-definition display
7-inch color touchscreen display can be programmed using basic web page technology for a tailored end user experience.

Global safety approvals
Serve a broader global customer base with agency approvals, SLATE is UL certified for U.S. and Canada, FM, and CSD-1 acceptable. SIL-3 (coming soon).

Universal power supply
24 VAC/DC – 230 VAC 50/60 HZ power supply makes SLATE compatible with nearly all global commercial and industrial requirements.
Easier installation

**On-board communication protocols**
Built-in BACnet and Modbus services mean there’s no need for a separate gateway, enabling seamless integration with Building Automation Systems.

**DIN-rail mountable**
Modular platform easily mounts to a DIN rail for faster installations in the field.

Efficient operation

**Intuitive diagnostics**
Simple, easy-to-understand messages enable real-time system monitoring and more timely, informed decision-making.

**Optimized energy efficiency**
Integrated O2 trim and two VFD control additions on the fuel air ratio control module ensure exceptional accuracy while optimizing burner performance.

**On-board system guides**
On-screen system guides make it easy to find answers or troubleshoot in the field.

Faster service

**Status indicators**
Technicians can quickly identify problems – no blinking lights, no fault codes and no manuals.

**Plug-and-play replacement**
Individual modules can be easily removed and replaced without purchasing and reprogramming a whole new platform.

**Easy data backup**
Application kit and platform information can be downloaded and saved with an SD card and USB drive.
It’s easy to switch.

Why engineer multiple systems to run an application when you can use one platform from Honeywell?

With configurable safety and programmable logic in a single platform, SLATE allows you to offer differentiated solutions more quickly, easily, and cost effectively than ever before. Trade complexity for simplicity today – and start realizing the benefits.
Exceptional support to enable your success

Product training
In-person or self-guided video modules.

Technical support
Tech support hotline for product and installation questions.

Global engineering services
Application engineers can assist with your most complex applications.
